BOROUGH OF CHARD

ANNUAL REPORT

THE MEDICAL OFFICER OF HEALTH

For the Year ended 31st December, 1938.

To the Mayor, Aldermen and Councillors of the Borough of Chard.

GENTLEMEN.

Once again I have the honour of presenting the Annual Report of the Medical Officer of Health. It speaks for itself, but I would like to comment on a few items in the

Firstly, I regret that the number of births of the year is the lowest on record—about a third of those a few years back. Part of the cause may be the scarcity of houses for people desiring to marry—a matter that surely can be remedied. Although so much has been accomplished, houses are still insufficient in number—there has been very little increase in the supply of houses available for those of moderate means. The quality—size, air space, conveniences, &c.—of the houses of Chard is greatly improved, but demolition of unfit houses has kept pace fairly well with rebuilding and as the individual family is smaller the need of more house still exists, although the population is not greater. The deaths (52) are moderate in number but are at more advanced ages. There was one death in the first ten years of life but that was at the age of 2 hours only and so came near to being a still birth.

Then there was only one death between 10 and 20 years, one again between 20 and 30, one between 30 and 40 and one again between 40 and 50. Between 50 and 60 there were 9, between 60 and 70 there were 10, from 70 to 80 sixteen, from 80 to 90 11, and one over 90 years. So in Chard we are becoming a fairly long lived race, and one may say that the majority die in or from old age.

I am indebted to Mr. Webb, the Sanitary Inspector, for the tables re housing activities, re sanitary inspections of dairies, slaughter houses, &c., and for taking samples of the public water supply, &c.

I am, Gentlemen, Your obedient servant,

ROBERT SUTHERLAND.

June, 1939.

SECTION A.

STATISTICS AND SOCIAL CONDITIONS OF THE AREA.

Area, 920 Acres.

Registrar-General's estimate of resident

Registrar-General's estimate of resident population mid 1938, 4,306.

Number of inhabited houses according to rate books (end of 1938), 1,255.

Rateable Value, £25,394.

Sum represented by a penny rate, £97.

SOCIAL CONDITIONS.—There has been little change from those given in former reports. The closing down of one large bobbin lace net factory caused, naturally, some increase in our unemployment figures, but the opening of a long disused factory as

an engineering works and foundry has somewhat offset this, and we hope that the recently closed factory will ere long be reopened for some fresh manufactures, and there is a prospect of another industry being started in other new premises.

EXTRACTS FROM VITAL STATISTICS. Totals. M. Live Births | Legitimate ... 32 14 Total 36 | Illegitimate ... 4 3 18 Birth rate per 1,000 of estimated resident population, 8.36. Still Births (Legitimate ... 2 2
Total 3 (Illegitimate ... 1 1
Rate per 1,000 total (live and still) births, 77. 52 32 Death rate per 1,000 of the estimated

resident population, 12.07. Deaths from Puerperal causes, nil. Rate nil. Death rate of Infants under 1 year of age:

All Infants per I,000 live births... 27.77

(one death) Legitimate Infants per 1,000 legitimate live births Illegitimate Infants per 1,000 illegitimate live births

Deaths from Cancer (all ages) " Measles (all ages) ... nil " Whooping Cough (all ages) nil " Diarrhea (under 2 years of age) ... nil
There was no unusual or excessive mor-

tality from any one cause. Death rate of England and Wales as a whole, 11 6.

Our local death rate, reduced by comparability factor, 9.29.

Causes of Death.—The General divides these into 36 categories. In 20 of these categories there were no deaths, so I will skip them.

Influenza ... caused Respiratory Tuberculosis ,, Non-Resp. Tuberculosis ,, 2 deaths Cancer ,, Diabetes ,, ,, Cerebral hæmorrhage ,, Heart Disease ... Circulatory Disease 11 ٠,٠, other than Cerebral Hæm., Heart Disease and Ancurism ... Bronchitis Appendicitis... ... " " Digestive Disease other
than Septic Ulcer,
Diarrhea, Appendicitis
and Lung Diseases
,,
Acute and Chr. Nephritis
,, Congenital Debility and Prem. Birth ... 5 Senility • • • ... 2.3 Suicide Other defined diseases

SECTION B.

GENERAL PROVISION OF HEALTH SERVICES FOR THE AREA.

Public Health Officers of the Authority: Medical Officer of Health, ROBERT SUTHERLAND, M.B., Ch.B. Vict. Part time only.

2 Sanitary Inspector, P. H. WEBB, M. Inst. M. & Cy. E. Part time only.

Assistant Sanitary Inspector, A. L. LARCOMBE. Part time only.

There are no changes to be recorded re laboratory facilities, ambulance, nursing in the homes, clinics and treatment centres or hospitals.

SECTION C.

SANITARY CIRCUMSTANCES OF THE AREA.

WATER. No change has been made in the public water supply. It has proved satisfactory in quantity and reports as to its quality have been very good except for one report in August that the sample sent showed "evidence of contamination although that is a marked degree." The next sample not in a marked degree." The next sample sent in September showed "No evidence of harmful contamination and all the other samples before and since reported "No evidence of contamination and the results are satisfactory."

Drainage and Sewerage.—No altera-

RIVERS and STREAMS.—No special action required.

PUBLIC CLEANSING.—No change.

SANITARY INSPECTION OF THE AREA.

Inspections for Sewerage and Dramage 124
Inspections for nuisances ... 32
Informal notices served Drainage tests and inspections ... Houses disinfected Dairies and Cowsheds Inspections Water Works Inspections
Slaughter House Inspections
... 349 RIVERS AND STREAMS.—No action required.

SHOPS AND OFFICES.—Found satisfactory.

CAMPING SITES.—Nil.

SMOKE ABATEMENT.—No action taken.

SWIMMING BATHS AND POOLS .- One only at the Grammar School and fresh water kept running in almost continuously. No special disinfection.

ERADICATION OF BED BUGS.- No action

Schools - Sanitary conditions satisfactory.

C. Proceedings under Sections 11, 13 and 26 of the Housing Act, 1936 :

(1) Number of dwellinghouses in
